

ScreenCloud for IT teams

Creating connected organizations with screens that communicate – for 9,000+ customers around the globe.

Organizations with engaged employees report **81%** less absenteeism, **43%** less turnover, **28%** less theft, and **64%** fewer safety incidents.

Gallup research

80% of the global workforce – 2.7 billion people – is deskless and digitally detached.

- **84%** say that they don't get enough direct comms from senior management
- **74%** feel that they are missing out on important information at work
- Only **10%** feel connected to their employer

Ragan

Modern engagement problems require modern solutions.

The solution's on the wall.

By using the screens on your walls and the content in your systems, ScreenCloud enables organizations to dynamically and cost-effectively communicate with their employees – at scale.

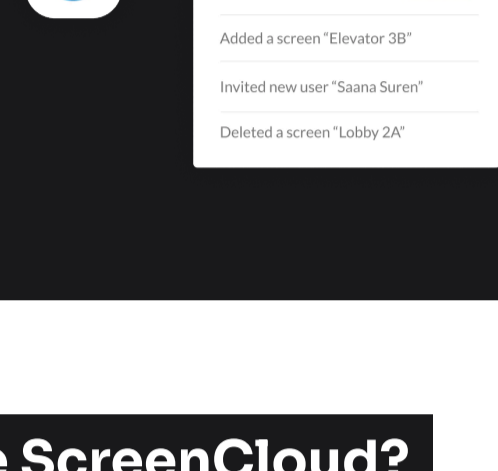

It's time to level the playing field between the deskless and desk-based; and drive digital transformation with a future-proof and scalable digital signage solution trusted by 8500+ customers around the globe.

Only 1% of B2B software spend is allocated to digital technologies for deskless workers – and 3 out of 4 disagree with the statement 'I have the tools needed to do my job'

Choose ScreenCloud for screens employees love, that admins love to manage.

With enterprise-grade security and performance – and a CMS that non-technical colleagues master with ease – IT leaders love us too.

Why should IT Teams choose ScreenCloud?

ScreenCloud combines support for a broad range of hardware with powerful network and user management tools, ensuring IT oversees a robust digital signage infrastructure.

ScreenCloud Studio provides a sophisticated yet easy to use content management system, ensuring teams across the business quickly become self-sufficient power users of digital signage. + world-class implementation, onboarding, training and support

96% of ScreenCloud users recommend Studio for its 'ease of use'. Our content management system Studio is automatically optimized for screen performance and aesthetic, and doesn't need to pass through IT or design teams before going live.

10 reasons you'll love ScreenCloud:

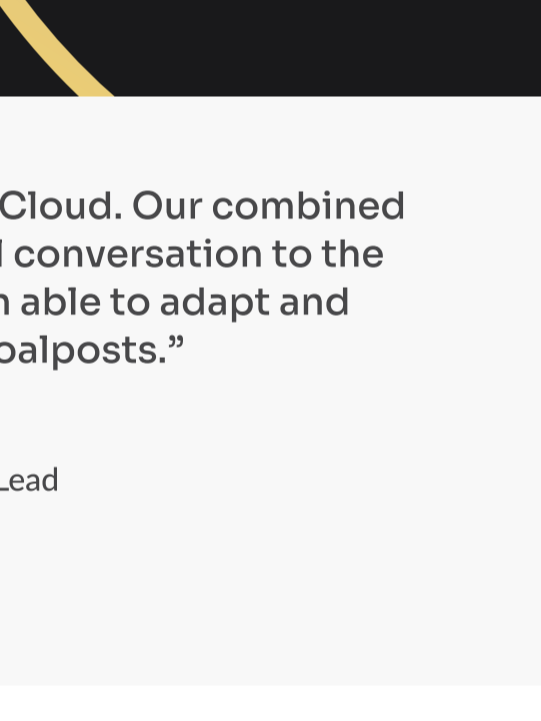

- 1 Cloud-based
- 2 5 minute set up
- 3 Hardware-agnostic
- 4 99% uptime SLA
- 5 Single sign-on
- 6 Granular user permissions
- 7 70+ built-in apps
- 8 150+ editable templates
- 9 1000s of integrations
- 10 24/5 professional support

ScreenCloud OS

The perfect pairing

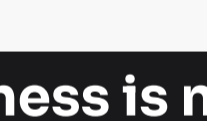

While ScreenCloud works with nearly all hardware, it works best with ScreenCloud OS – an operating system high-performance, high-specification and competitively priced.
